Ms. Lisa Green, Manager
Environmental Restoration Program
Department of Energy
Idaho Operations Office
850 DOE Place
Idaho Falls, Idaho 83401-1563

SUBJECT: DRAFT Scope of Work for Operable Unit 7-13/14- Waste
Area Group 7, Comprehensive Remedial
Investigation/Feasibility Study-INEL-95/0253

Dear Ms. Green:

The Idaho Department of Health and Welfare, Division of
Environmental Quality (IDHW-DEQ) received the above-referenced
document on June 9, 1995, reviewed it for content, and is
providing comments pursuant to the FFA/CO.

The SOW, as presented, does not provide the level of detail this
particular Comprehensive RI/FS should generate. Rather, the WAG
7 Comprehensive Remedial Investigation Baseline Risk Assessment
Methodology of June 28, received by IDHW-DEQ on June 30, after
some further modification, would appear to be a better product in
this regard. Therefore, in light of the assumptions made in the
Methodology paper and the unknown output of the yet to be held
scoping session on July 19/20, IDHW recommends the draft SOW,
Methodology paper, and comments from the meeting be combined to
prepare the Draft Final.

Sincerely,

Daryl Koch
WAG 7 Manager
Remediation Bureau
